

Wormwood Scrubs Ecological Masterplan

4. Enhancing visitor experience - have your say

The project will also include new features to create an arrival experience, sign the way to key destinations and explain the importance of the ecological habitats. We are planning to work with an artist to enhance some of the entrances. What do you think of the different interventions shown below?

-  Entrance locations. Please refer to numbering for questionnaire
-  Directional signage
-  Ecological / historical interpretation
-  Drinking fountain
-  Existing routes and connection (unpaved)
-  New routes and connections (unpaved, proposed to be delineated with planting and mowing)

Visitor experience improvement works will include some or all of the following:

Surfacing and maps

Water fountain

Vehicle barriers

Directional signage

Interpretation boards

Interpretation boards will be installed across The Scrubs to inform people about wildlife and habitats

There are many options for creating an identity and improving arrival experience: which ideas do you like?

Sculptural elements and carving

Bollards / posts / vertical elements

Ground plane interventions
